Map Book Legend

Centerlines	Emergency Service Stations
Classification	Type
Highway	DES HQ
State Road	EMS
Ramp	Fire
County Road	Police
Municipal	Hospital
Private	Fire Hydrants
Driveways > 500 ft	Address Number
Trails	Highway Mile Markers
Streams	Highway Exits
Parcel Lines	Trail Mile Markers
Buildings	Map Grid
US Highway	State Road

Disclaimer:

The map information provided in this atlas is made available as a public service. The information provided was created for internal use by Queen Anne's County government staff and is used for reference purposes only. Every effort is used to ensure the accuracy of the data, however accuracy is not guaranteed. The map information contained herein is provided "as-is" without warranty of any representation of accuracy, timeliness, reliability, or completeness. Use of this Data for any purpose should be with acknowledgment of the limitations of the Data, including the fact that the Data is dynamic and is in a constant state of maintenance, correction, and update. Parcel data was prepared and is compiled from recorded deeds, plats, and other public records. Users of the data are hereby notified that the aforementioned sources should be consulted for verification of the information. Queen Anne's County shall assume no responsibility for damages or other liabilities due to the accuracy or inaccuracy, availability or unavailability, use or misuse of the information herein provided.

About this atlas and the data provided:

Thank you for your interest in this atlas. We hope you find the information offered within to be useful; however, first there are a few things that should be noted.

About the Grid

This atlas was compiled using the traditional ADC Grid; however a few adjustments have been made in order to improve the usefulness of this atlas. These changes include dividing all pages into four quadrants NW, NE, SW, and SE. Therefore all pages in this atlas are marked with their respective page number followed by their respective quadrant (ex. 45NW). Additionally, in densely populated areas these quadrants have been divided into smaller grids to improve legibility. These smaller grids are labeled with their corresponding page number/quadrant followed by either: A, B, C, D (ex. 43SE A). Not every quadrant has been split into these smaller grids, and those that have been may not have been divided evenly. This means that though a quadrant may have been separated into smaller grids there may not be an A, B, C, & D. Instead the quadrant was only split into smaller grids where needed allowing for some quadrants to have only one, or all four of the smaller grid designations.

In an effort to facilitate easier navigation of the atlas each page has eight (8) arrow indicators that tell the map reader which map page is adjacent to the current page in that compass direction.

In addition to the map page numbers, each page in the document is given a document page number in order to help keep the pages in their correct order. This page number can be found in the lower right corner of each page in this document starting with the index.

About the Fire Hydrants

The fire hydrants found in this atlas should only be used for locating the fire hydrants. While an effort was made to field verify that each hydrant physically existed, no efforts were made to assess the functionality and/or water flow of the fire hydrants. Additionally, dry hydrants and other water sources were not included in this atlas due to a lack of accurate, viable data.

About the Centerline and Address Point labels

While every effort was made to include as many centerline labels and address point labels as possible, given the static nature of set-scale printed maps, not all centerlines and address points could be labeled in this atlas. Our hope with this method of labeling is to provide a general reference for the location of areas within the county.

Again, we thank you for your interest in this atlas, and hope you find the information contained useful. If you have any questions regarding the data included please contact Queen Anne's County GIS.
